Topic #2 – Digital ID and Authentication Roundtable

Consumer's new “digital front door” to health care

“The Key”

Digital Identity and Authentication for the Organization, Application, and Individual

What: Creation or acceptance of an identity proofed digital identity credential that has been securely authenticated

Solution: Consumer Identity and Access Management (CIAM) solution

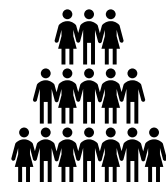

“The Door”

Standardized FHIR-based API data exchange

What: Standardized clinical, financial, administrative, and SDOH APIs

Solution: Development of an API Gateway

“Community of Problem Solvers”

B2C health and health care applications

What: Innovative applications solving a myriad of health care use cases

Solution: An automated application registration process

“Your Family”

Patients, Members, Caregivers, and others

What: Consumers consenting to when, where, and how they want to share their data to achieve their goals

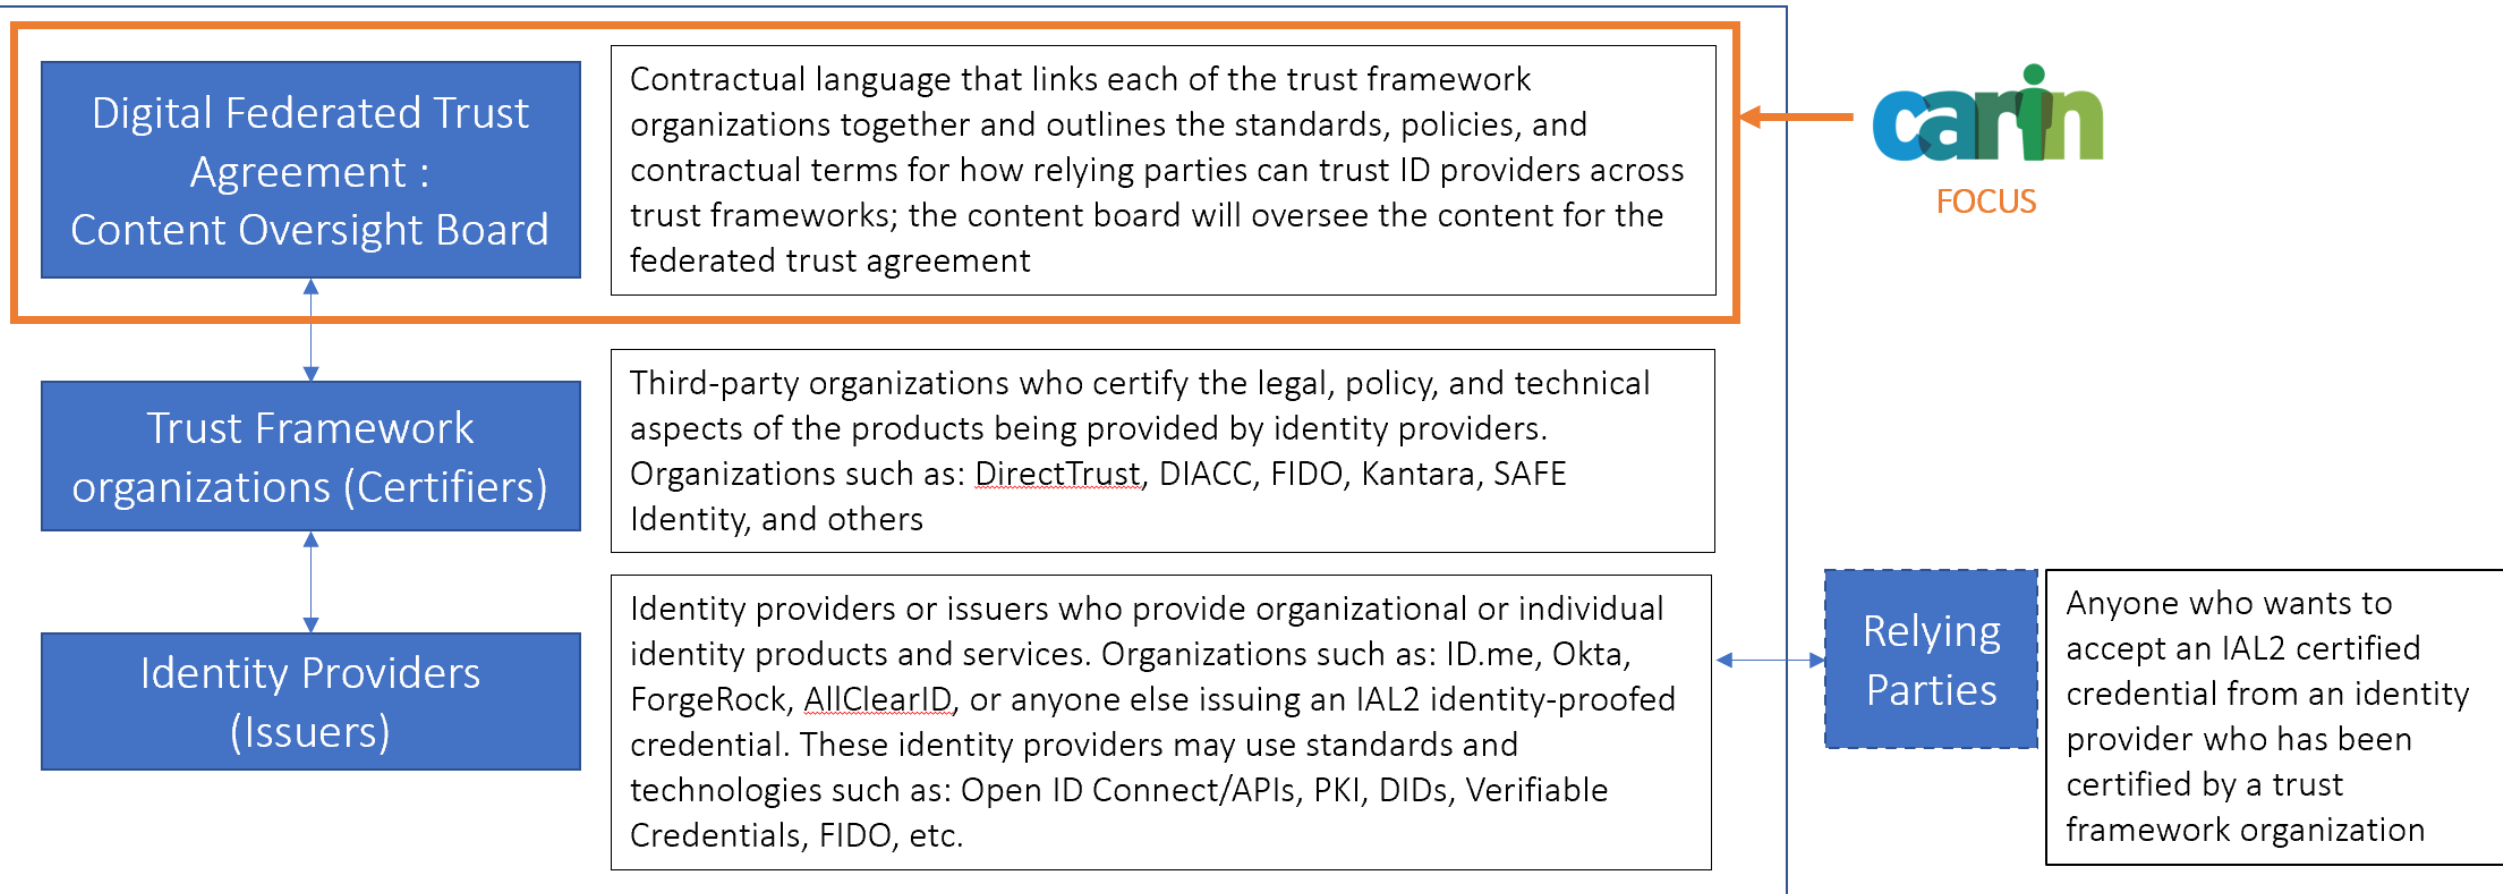

Solution: An Individual proactive, informed, and (ideally) federated consumer-directed, consent-based data sharing framework (As a start: CARIN's Code of Conduct and Trust Framework)

Our approach to create a volunteer Trusted Federated Identity Ecosystem

Trusted Federated Identity Ecosystem

To access the Digital ID and Federation whitepaper, go to:
CARINAlliance.com and select Our Work → Digital Identity → Download our Digital Identity and Federation White Paper

Introduction of our panelists for today's roundtable

Leadership Perspective

Aneesh Chopra

CARIN Celebration and Networking Event

We are meeting in a social, virtual world: <https://bit.ly/3mdRkV2>

Getting there: Open the link above on a laptop or desktop (no mobile or tablet) with a webcam

- You must use Chrome or the latest version of Edge! You may need to install one of those to join
- Do not use Citrix!
- Give permission to use the camera and microphone to activate the app
- If you have network problems, then try another network. For example, your mobile phone's hotspot

How it works: There are 5 islands for you to meet and chat with other CARIN community members

- Pick an island to start on and “hop” to other islands at your leisure
- We have room for 125 people
- Moving around:
 - Using your **mouse or touchpad to steer**, the letter **W** moves **you forward**, and the letter **S** moves **you backward**
 - With **Shift + W** you can run faster
 - If you **look at a stool or tree stump**, it will turn pink and you can **sit down** using the letter **E** or with your mouse button. You can also **stand up** with the letter **E**
 - Use the **space bar** to jump
 - With **Escape (Esc)** you **regain control of your mouse**.

Traveling Tips	
W	Forward
S	Backward
Mouse/ Touchpad	Use to steer while moving forward or backward
Shift+W	Run faster
Space bar	Jump
E	Sit or stand
Escape (Esc)	Regain control of your mouse
